Hey Pete,

I'm in the field thru tomorrow. I'll check the field notes when I return to the Lab.

Cheers,

rrr

Hi Randall-

I'm trying to convert the May 4, 10, and 21 water-level measurements in MW-02 to a common datum. My understanding is that the May 4 measurement of 955.03 feet is relative to land surface and the May 10 (820.69') and 21 (644.72') measurements are relative to the top of casing. Could you tell me the height of the MP on the casing so I can convert the May 10 and 21 measurements to depth below land surface?

Thanks much,

Pete
